Ontario's Data Strategy At A Glance

- Data Strategy - Overview
- The Minister's Digital & Data Task Force
- Engagement Plan

“Data is transforming the world around us, and the government needs to catch up. This is why the government is supporting the digital transformation through ongoing consultations on the province’s first data strategy.”

– Ontario Budget 2019

Data Strategy Overview: Three Core Pillars

The Ministry of Government and Consumer Services is leading the development of Ontario's Data Strategy, which has three key pillars:

Promoting Public Trust & Confidence

Build public confidence and protect Ontarians' privacy and security in response to contemporary data practices

Creating Economic Benefits

Create an enabling environment for Ontario firms to develop data-driven business models

Enabling Better, Smarter, More Efficient Government

Unlock the value of data within government operations by promoting more widespread use of data-driven technologies

Minister's Digital and Data Task Force

- Short-term advisory body comprised of top-tier leaders and experts from industry, research, academia and the not-for-profit sector
- Role is to make recommendations concerning reforms to statute, regulation, policies and programs.

Members

- **Linda Mantia**, former SEVP and Group Chief Operating Officer, Manulife Financial (Chair)
- **Bryan Smith**, Co-Founder and CEO, ThinkData Works (Vice-Chair)
- **Bilal Khan**, Managing Partner and Head, Deloitte Data
- **Avner Levin**, Professor, Ted Rogers School of Management, Law & Business Department
- **Maithili Mavinkurve**, co-founder and COO, Sightline Innovation
- **Shyam Oberoi**, Chief Digital Officer, Royal Ontario Museum
