

Illustrative Municipal Sales Tax Allocation - Alphabetical

Based on 2014 FIR Data

The Municipal Sales Tax revenue (the “MST revenue”) allocation provides funds to single- and lower-tier municipalities according to their number of households. Upper-tier will receive a share of each lower-tier’s MST revenue based on its share of own source revenues. The per-household amount is based on a sliding scale, which was developed to reflect the differing economies of scale between small and large municipalities. The allocated MST revenues are capped at 50% of the municipal property taxation.

Illustrative Municipal Sales Tax Allocation - Alphabetical

Based on 2014 FIR Data

The Municipal Sales Tax revenue (the “MST revenue”) allocation provides funds to single- and lower-tier municipalities according to their number of households. Upper-tier will receive a share of each lower-tier’s MST revenue based on its share of own source revenues. The per-household amount is based on a sliding scale, which was developed to reflect the differing economies of scale between small and large municipalities. The allocated MST revenues are capped at 50% of the municipal property taxation.

Households		Rate per Household
Lower Range	Upper Range	
0	499	573
