

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

| MUNICIPALITY                                     | Region | tier | RSCM (%) | COMPOSITE BY INDICATOR CATEGORY |        |                 |        |   |        |              |        |          |        |           |        | OVERALL COMPOSITE INDICATOR   |        |

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

| MUNICIPALITY                       | Region       | tier     | RSCM (%) | COMPOSITE BY INDICATOR CATEGORY |        |                 |        |   |        |              |        |           |        |           |        | OVERALL COMPOSITE INDICATOR   |        |

**PMFSDR Municipal Fiscal Health - Overall Composite Indicator**

**Note:**

- The "decile" is defined on a range from 1 to 10. The first "decile" signifies relatively good fiscal health whereas the tenth "decile" signifies relatively poor fiscal health.
- Composite indicator calculated by taking all individual indicators each weighted and then dividing by the sum of all indicator weights.
- All categories are equally weighted.
- For each composite indicator, a lower composite value for each category signifies relatively good fiscal health whereas a higher composite value signifies relatively poor fiscal health.
- RSCM - The Rural and Small Community Measure (RSCM) represents the proportion of a municipality's population residing in rural areas or small communities, as classified by Statistics Canada.
- ST = single tier, LT = lower tier, UT = upper tier

| MUNICIPALITY                       | Region | tier | RSCM (%) | COMPOSITE BY INDICATOR CATEGORY |        |                 |        |   |        |              |        |          |        |           |        | OVERALL COMPOSITE INDICATOR   |        |
