

CYBERSECURITY

# Cyber Incident Response Services

Thank you so much for your participation in our recent ransomware workshop. We hope you found the demonstration and discussion insightful and valuable. To further enhance your team's cybersecurity awareness and preparedness, we have included some additional resources here:

- **Webinar Recap:** [Behind the Scenes of Cybersecurity: 10 Key Insights from Managing Cyber Incidents](#)
- **eBook:** [The Six Stages of a Successful Incident Response](#)
- **eBook:** [8 Core Elements & 5 Key Factors to an Effective Security Awareness Program](#)
- **Weekly Cyber News:** Stay updated with the latest in cybersecurity through our weekly newsletter, packed with valuable insights and a CyberTip. [Subscribe here.](#)

Moreover, if your municipal hasn't signed up yet, we would like to introduce the **Cyber Incident Management Program for Ontario Municipalities (CIMOM)**, a collaborative initiative between Local Authority Services (LAS) and ISA Cybersecurity. CIMOM is designed to assist municipalities of all sizes and budgets in effectively responding to cyber threats. It offers expert support in assessing, identifying, and mitigating these threats, along with valuable post-incident insights. Learn more about the program [here](#).

We would love to hear about your specific incident response needs and challenges. Please don't hesitate to request a one-on-one discussion with our experts at your convenience.

Thank you again for your participation, and we look forward to connecting with you soon.
